SUMMARY

Looking for a challenging role in a reputable organization to utilize my technical and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector. I always wanted to be a building block for your company's development.

EXPERIENCE

Senior Software Developer

Healthwatch Telediagnostics Pvt. Ltd.

April 2024 - Present, Chennai

- Designed and implemented RESTful APIs using Asp.Net Core Web API.
- Developed dynamic and responsive user interfaces with Angular, HTML5, CSS3, and TypeScript.
- Managed databases using SQL Server for efficient data storage and retrieval.
- Configured IIS (Internet Information Services) hosting for deployment of web applications.
- Published the website using IIS, ensuring seamless access and availability to users.
- Altered the UI design and implemented business logic in a .NET desktop application(C#/WinForms), then built and packaged it into an executable .exe file using Visual Studio.
- Designing the Database structure for the project before live database creation.

Full Stack Developer

Nohitatu Technology (P)Ltd

January 2023 - March 2024, Chennai

- Designed and implemented RESTful APIs using Asp.Net Core Web API.
- Developed dynamic and responsive user interfaces with Angular, HTML5, CSS3, and TypeScript.
- Managed databases using SQL Server for efficient data storage and retrieval.
- Configured IIS (Internet Information Services) hosting for deployment of web applications.
- Enhanced system efficiency by optimizing existing Asp.Net Core Web API endpoints, reducing average response time by 45% over a 6-month project using Entity Framework and Postman for performance testing.

PROJECT

CHC Pharmacy (Web), Mobile App (CHC Pharmacy, CHC Doctor, CHC Delivery)

Healthwatch Telediagnostics Pvt. Ltd. • chcpharmacy.com/

- Developed RESTful APIs using .NET for CHC Pharmacy Web platform supporting medicine ordering, order tracking, and consultation booking.
- Implemented real-time order lifecycle management (Placed → Assigned → Out for Delivery → Completed) integrated with external mobile applications via secure APIs.
- Designed role-based access control and centralized admin dashboard for operational management, doctor scheduling, and delivery assignment.
- Optimized database queries and API performance to support scalable multi-user healthcare transactions.

Meterbox (Web), Meterbox (Mobile App)

Healthwatch Telediagnostics Pvt. Ltd. • meterbox.chchealthcare.in/

- A human resources management system, also human resources information system or human capital management system.
- A form of human resources software that combines a number of systems and processes to ensure the easy management of human resources, business processes and data.
- To maintain the attendance details and update the payroll process.

Connect (Web), Connect (Mobile App)

Healthwatch Telediagnosics Pvt. Ltd. • hwconnect.chchealthcare.in/

- Using holter device to read the heart rhythm and generate the report to patient and doctor.
- Register the patient details and Update the device.
- Check the heart rhythm to update the issue on the website then send the doctor mail.
- To provide the report the ECG data.

IIS Management System

Healthwatch Telediagnosics Pvt. Ltd.

- Designed and developed a custom IIS Management & Deployment System to automate build file uploads, application hosting, and server configuration for web applications.
- Implemented automated deployment workflows including application pool stop/start, website restart, and build publishing directly to production servers.
- Built centralized logging and monitoring module to track deployment history, errors, server activity, and update status for audit and troubleshooting purposes.
- Enabled secure remote build updates to live IIS environments, reducing manual deployment effort and improving release efficiency and reliability.

Phicure

NOHITATU Technologies private limited • phicure.com

- Patient details can be saved to generate the report based on queries used for future purpose.
- Maintaining the Hospital management and account details and medicine and consultation details.
- Patient booking details to download the report in online.

Product Management System

Accord Info Matrix

- Developed a backend system using Core Java to manage customer information and product master data.
- Implemented CRUD APIs/services for efficient data entry, updates, retrieval, and deletion of records.
- Designed relational database schema and integrated backend logic for secure data handling.
- Strengthened understanding of backend architecture, data validation, and application flow design.
